Standardized tests of Reading and Math place the Hawaii DOE in the national cellar. In Hawaii, juvenile crime falls in summer, when school is not in session. Juvenile hospitalizations for human-induced trauma fall in summer. Politically-connected contractors charge the State over \$200,000 per room to build classroom buildings. The legislature spends over \$2 billion per year, over \$10,000/student to operate this corrupt and wasteful system. The Hawaii DOE wastes taxpayers' money and trashes poor kids' life chances. Effective reform will require a change in the majority of the State Legislature, the Hawaii Supreme Court, and the Board of Education. Students, parents, real classroom teachers, and taxpayers would gain from policies which give to parents the power to determine for their own children which institution, if any, shall receive the taxpayers' K-12 education subsidy, but parent control would reduce the revenue stream which self-serving politicians and administrators currently control. Concerned parents should not wait for politicians to fix this system. Homeschool. Nothing in Hawaii law requires that homeschool instruction occur between 0800 and 1430. Pool resources with neighbors, extend daycare to age 18, and take the GED at 17. Please visit my weblog, The Harriet Tubman Agenda, for links to more information. Good luck to you all.

"Give into the power of the teacher the fewest possible coercive measures, so that the only source of the pupil's respect for the teacher is the human and intellectual qualities of the latter."—Albert Einstein--.
